15. <http://us.oneworld.net/article/view/126829/1/>
16. <http://www.virus-scan-software.com/virus-scan-help/answers/the-history-of-computer-viruses.shtml> industry of virus creation and destruction
same as point 8 and 9
17. So all of this looks like a **pyramide scheme boy**... <http://www.google.gr/search?hl=el&q=pyramid+scheme+albania&btnG=%CE%91%CE%BD%CE%B1%CE%B6%CE%AE%CF%84%CE%B7%CF%83%CE%B7&meta=>
18. <http://www.google.gr/search?hl=el&q=Elf+affair&btnG=%CE%91%CE%BD%CE%B1%CE%B6%CE%AE%CF%84%CE%B7%CF%83%CE%B7&meta=>

So by using corrupt computers (outside of internet) it was easy to pump out zillions of cars, bypassing all chemical laws, altering trading docs, entering in to financial institutions, and banks and kick up drugsmuggling nicely.... all since 1986 aprox in mainframes in cobol and in pc since 1996 and also inventing some sort of fraud pyramide scheme with help of taps in to gov's and banks.... nice ...

<http://www.spsychips.com/index.html>

<http://www.transparency.org/>

By creating chaos something better should come out??? was that the idea? How now then **to get out** of that situation smarties?

<http://www.japan1.freewebspace.com/birdienamnam.htm>

Conclusion: By separating out Internet **totally from the operations** of banks gov's and buissnes, **changing operating systems**, and using hardware firewalls and understanding the risks with WIFI and digital fishtankmodels and that history repeats again with simialir actors as usual... "the usual suspects" there maybe will be solutions over time.. as getting the nose out of this mess.. <http://images.google.com/images?hl=en&lr=&q=cocaine%20tons&btnG=Search&sa=N&tab=wi>
